

sleepcube

STANDARD

...feel refreshed!

The SleepCube Standard is the first in the new SleepCube range of Sleep therapy devices from DeVilbiss Healthcare.

The SleepCube standard is a fixed pressure CPAP designed for the effective treatment of OSA. It is equally suitable for use in the home or the hospital and its robust ergonomic design and small size makes it the ideal travelling companion. The SleepCube Standards' multi-voltage

capability means that it can be used virtually anywhere in the world and can also be operated from a 12 V DC power source such as those found in a motor home, recreational vehicle or boat.

The optional heated humidifier integrates seamlessly into the system and the SleepCube standard is packed full of all the features needed for a restful and refreshing nights sleep.

SPECIFICATIONS

Dimensions (H x W x L)

10.8 x 16.5 x 17.8 cm

Weight

1.18 kg
